

Bug ID: BR-005

Title: Mobile layout breaks on product details page

Description:

UI elements overlap when product page is opened in mobile view.

Steps to Reproduce:

1. Open Amazon Brazil homepage
2. Resize browser to mobile view or open on mobile device
3. Open any product details page

Expected Result:

Layout should adapt properly to mobile screen size.

Actual Result:

Images and buttons overlap, affecting usability.

Severity: Medium

Priority: Low

Environment: Chrome Mobile / Android

Status: Open
